ACOC-L1000

ACID WASHED GRANULAR COCONUT SHELL BASED ACTIVATED CARBON

ACOC-L1000 is a high activity Granular Adivated Carbon manufadured by high temperature steam activation from selected grades of coconut shell then acid washed and subsequently pH neutralised to improve purity.

ACOC-L1000 is suitable for use in a wide variety of liquid purification and applications such as process water treatment, boiler condensate treatment and beverage production.

The well-developed microporous structure of ACOC- L 1000 gives it a significant advantage when adsorbing lower molecular weight organic molecules, particularly under low concentration conditions.
