# WPAC-100/18 FLUE GAS POWDERED ACTIVATED CARBON

WPAC-100/18 is a Powdered Activated Carbon manufactured by high temperature steam activation and homogenised for consistent performance.

WPAC-100/18 is designed for flue gas treatment and offers a special pore structure that provides high adsorption capacity for dioxins and mercury when injected into the abatement system.

Due to the optimised balance between adsorption and transport pores of WPAC-100/18 it's suitable for use in dry scrubbing, wet-dry, semi-wet, semi-dry and wet scrubbing.
